**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/820,994	<b>Applicant(s)</b> KATAOKA ET AL.	
	<b>Examiner</b> Arun S. Phasge	<b>Art Unit</b> 1795	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### ***Claim Rejections - 35 USC § 103***

Claims 1-4, 6-10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bishop of record for reasons of record.

The intended use limitation of the solution are given little or no patentable weight, because it has been well settled that the intended use of a composition is not patentable significant. *In re Heck* 114 USPQ 161 (CCPA 1957).

With respect to the method claims, the exact type of surface being treated would have been obvious to one having ordinary skill in the art, because the patent teaches the treatment of copper surfaces as claimed.

#### ***Response to Arguments***

Applicant's arguments filed 7/7/08 have been fully considered but they are not persuasive.

Applicants appear to argue that the composition of Bishop produces a different result than is claimed. However, it is not readily apparent and no further proof is provided that the solution of Bishop would produce a different result. Indeed, the comparative results contained in the specification have no bearing on the present rejection, because the Bishop patent does treat the surface with a solution that is essentially the same.

Applicants further argue that the Bishop composition is not the same, since it does not consist essentially of the claimed components.

The phrase “consisting essentially of” may include any unrecited ingredient which does not affect the basic and novel characteristics of the invention. *Ex parte Davis* 80 USPQ 448. It is unclear from reading the record, whether the addition of the minute amounts of oxidizing agents, including “dissolved air or oxygen” would affect “the basic and novel characteristics of the invention.” Indeed any solution would inherently a minute portion of dissolved air therein, unless precautions are taken to insure no dissolution.

Accordingly, since applicants have not provided any comparative results with the present claimed invention and the solution and method taught by Bishop showing the alleged differences, the claims stand rejected.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arun S. Phasge whose telephone number is (571) 272-1345. The examiner can normally be reached on MONDAY-THURSDAY, 7:30-6:00.
